

Melita Flynn – CCG Community Program Manager

Melita has been working with the Capital Chemist Group for the last 23 years, Melita commented to these years being “the most rewarding years of my working life.”

Melita started at Capital Chemist Wanniasa and now works as part of the head office team, as the Community Program Manager.

“This position gives me the greatest satisfaction, being able to meet so many passionate people who work within the charities and organisations we support. I see firsthand how our financial assistance helps in so many ways and this makes me feel incredibly grateful for the position I hold. I have had the pleasure to share the journey with many charities and individuals. Watching children with Cerebral Palsy interact with their families through specialised equipment we have bought for them, catching the smiles on the children that ride our sponsored horse at Pegasus which gives them the core strength they need, and playing a big part in young people’s lives with our Capital Chemist College Scholarships giving them the opportunity to explore their education further, these are some of the things that I find most rewarding.”

Capital Chemist is one big family and a backbone to our community.

“This has made me all the richer knowing our willingness to contribute to others makes such a difference.”
